

# Structural Compensation

## Protection of Constructions

Fire protection strengthening of construction parts, e.g. Facades, walls, ceilings etc.

## Protection of Openings

Protection of openings in fire walls e.g. at conveyors

## Protection of Partial Areas

Protection of partial area in non-protected areas, e.g. escape routes & partial storage areas

**Target: Compensation of passive structurally oriented fire Protection measurements by an extinguishing system**

Innovative, customized, reasonable
